PROFILE

Final-year BSc Computer Science student at KNUST with experience in machine learning, data analysis and software development, and in leading a student association through its relaunch. Has built a no-code machine learning platform and mobile applications, completed remote internships in data science and AI/ML, and established partnerships with institutional and diplomatic actors. Seeking to apply digital, data and AI skills to real-world development and engineering challenges. Fluent in English and French.

EDUCATION

Bachelor of Science in Computer Science Nov. 2022 – Sept. 2026
KNUST, Kumasi, Ghana. Final-year studies and project defence completed; final results due October 2026; Graduation expected February 2027.

English Language, B2 Certificate May 2022 – Aug. 2022
Ghana Institute of Languages, Kumasi, Ghana

Baccalauréat (Mathematics and Physics) Sept. 2018 – July 2021
Lycée Classique d'Abidjan, Abidjan, Côte d'Ivoire

EXPERIENCE

President, AEF (Francophone Students Association), KNUST Oct. 2025 – Sept. 2026
- Led the relaunch of the association after a period of inactivity by organizing academic and social activities to strengthen student engagement.
- Established partnerships with institutional and diplomatic actors to broaden the opportunities available to members.

AI/ML Online Intern, ShadowFox Nov. 2025 – Dec. 2025
- Applied machine learning concepts to practical tasks in a structured online internship, working with real datasets to build and evaluate models.

Data Science Online Intern, ShadowFox Sept. 2024 – Nov. 2024
- Cleaned, analyzed and interpreted data in a remote internship programme, including data visualization with Matplotlib and Plotly and an air quality trend analysis.

Vice President, AEF (Francophone Students Association), KNUST Oct. 2024 – Oct. 2025
- Supported the president in strategic planning and decision-making, and coordinated the work of committees to meet the organization’s objectives.

Logistics Manager, Les Lys Entreprise, Grand Bassam Oct. 2023 – Déc. 2023
- Tracked tasks and managed administrative documentation for construction projects using Microsoft Office, keeping physical and digital records accurate and accessible to stakeholders.

PROJECTS

MLCloud: No-Code Machine Learning Platform
- Built a no-code machine learning platform with Python and Flask that lets users upload datasets, train models and view results through a web interface without writing code.

Data-Centric AI Case Study: Heart Disease Prediction
- Studied the effect of data quality on machine learning model performance by comparing a baseline model with a model trained on cleaned data, using the UCI Heart Disease dataset.

FinderApp: Discovery of Activities and Events in Côte d'Ivoire (In progress)
- Mobile application for discovering local activities and events in Côte d'Ivoire, built with React Native, Expo Router and TypeScript. Currently a front-end demonstration, with backend integration planned.

Machine Learning and Deep Learning Projects
- Three end-to-end deep learning projects: image classification (CNN, TensorFlow/Keras, CIFAR-10), sentiment analysis (DistilBERT, PyTorch, IMDB) and text summarization (BART), published as demonstrations on GitHub Pages.

Gesture-Based Media and Smart Home Control: Final-Year Project
- Media playback control through hand gesture recognition using OpenCV, MediaPipe and Python, with ESP32/Raspberry Pi integration to extend gesture control to smart home functions.

Code Quest: Mobile Application

- Designed the UI/UX in React Native as part of a frontend team for a cross-platform mobile application project at KNUST.

PROFESSIONAL TRAINING AND CERTIFICATIONS

Data Science Online Internship, ShadowFox	Sept. 2024
Cloud Computing Fundamentals, IBM SkillsBuild	July 2025
Cybersecurity Fundamentals, IBM SkillsBuild	Aug. 2025
Python Programming Language, IBM SkillsBuild	Aug. 2025
Introduction to Artificial Intelligence, Udemy	Sept. 2025
Artificial Intelligence Fundamentals, IBM SkillsBuild	Feb. 2026
AI and Digital Transformation in Government, Oxford Saïd Business School / UNESCO	Sept. 2026

LEADERSHIP AND VOLUNTEER ACTIVITIES

- Orientation Day (Feb. 2024): helped coordinate new students during the orientation day.
- Peer Tutoring (Feb. 2025 – Present): manage peer tutoring among Francophone students by pairing newcomers with tutors, and mentor students within the department.
- AI & Science Interest Group (Feb. 2026 – Present): founded an interdisciplinary community for students interested in artificial intelligence and computer science, organizing introductory sessions and peer-learning opportunities.

SKILLS

Tools: VS Code, TensorFlow, PyTorch, Scikit-learn, Git/GitHub, MySQL, MongoDB

Programming languages: Python, C/C++, JavaScript

Other: Team leadership, project coordination, analytical problem solving, effective communication

Languages: English (fluent), French (native), Spanish (beginner)
